Art Unit: 1653

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claims 1-11, 13-15 and 17-18 (pertaining to the peptide) are drawn to an assay method for a compound to modulate ATM or protein activity, classified in class 435, subclass 7.1.

II. Claims 12, 16 and 17-18 (pertaining to nucleic acid) are drawn to a nucleic acid isolate, classified in class 536, subclass 23.1.

III. 19-27 are drawn to an assay method for a compound to affect DNA, classified in class 435, subclass 6.

IV. Claim 28 is drawn to a pure ATM, classified in class 530, subclass 350.

V. Claim 29 is drawn to a pure ATR, classified in class 530, subclass 350.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because the product of Groups I and II have different functions and modes of operation and the products of Groups IV and V are alternate products. The method of Group III is also an alternate method. Under PCT Rule 13.1 applicant is entitled to the first product, method of making and using said product. In addition, the invention of Group III does not escape the prior art as Savitsky et al. (Human Molecular Genetics, vol.4, 1995, pages 2025-2032) teach the subject invention. Thus, these inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 1653

must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
